

DATA SHEET

Water in Bitumen Test Set

81-B0155/A

General description

Used for determining the water content of bituminous and petroleum materials by distillation with a water immiscible, volatile solvent. Comprising:

- Glass still 10 ml
- Glass receiver
- Glass condenser
- Electric heater with thermoregulator

- Power: 250 W
- Weight approx.: 4 kg

Standards

- AASHTO T48
- ASTM D244
- AASHTO T55
- AASHTO T59

Products

81-B0155/A

Water in bituminous material test set (Dean-Stark)230V/50-60Hz/1Ph

81-B0155/AZ

Water in bituminous material test set (Dean-Stark)110V/60Hz/1Ph
