

## DATA SHEET

### Slotted Distance Pieces

Slotted distance pieces 50-L1000/100B, 50-L1000/68B and 50-L1000/50B

#### General description

Made of steel. Used to reduce the vertical daylight of the compression machines model 50-A29xxx and 50-A39xxx depending on the size of the specimen and considering that, in general, the maximum piston travel is 50 mm. Slotted distance pieces are inserted between the upper crossbar and the spherical seat. To lower the spherical seat you have to use the axial screw assembly.

#### Products

##### 50-L1000/100B

Slotted distance piece dia. 7.7"x4" height (dia. 195x100 mm height)

##### 50-L1000/40B

Slotted distance piece dia. 7.7"x1.6" height (dia.195x40 mm height)

##### 50-L1000/50B

Slotted distance piece dia. 7.7"x2" height (dia. 195x50 mm height)

##### 50-L1000/68B

Slotted distance piece dia. 7.7"x2.7" height (dia.195x68 mm height)
