

## DATA SHEET

# Filler Compaction Apparatus

48-D0447

## General description

The apparatus is used for the determination of the void content of dry compacted filler. It consists essentially of three components:

- A metal base size 100x150 mm
- A cylinder 25 mm int. diameter
- A plunger of a diameter allowing it to slide freely in the cylinder without lateral play.

It can be fit with a Blow counter kit. See accessories.

- Weight approx.: 3.5 kg
